INVESTMENT PERFORMANCE SERVICES, LLC

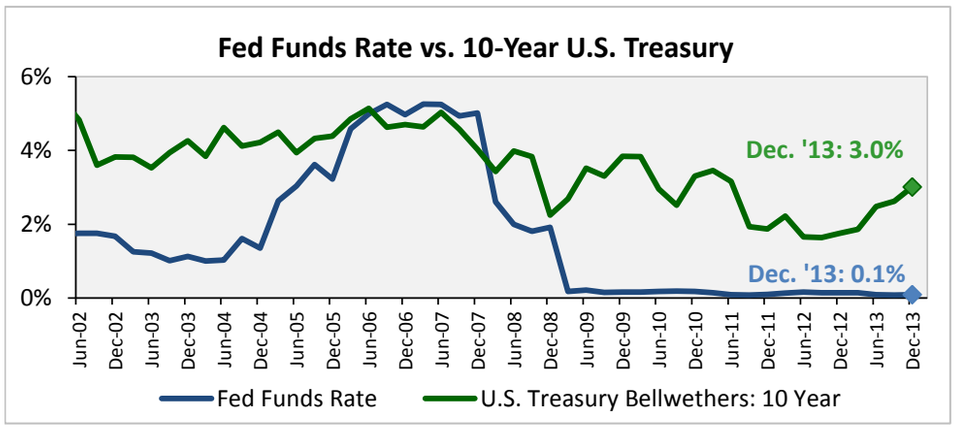
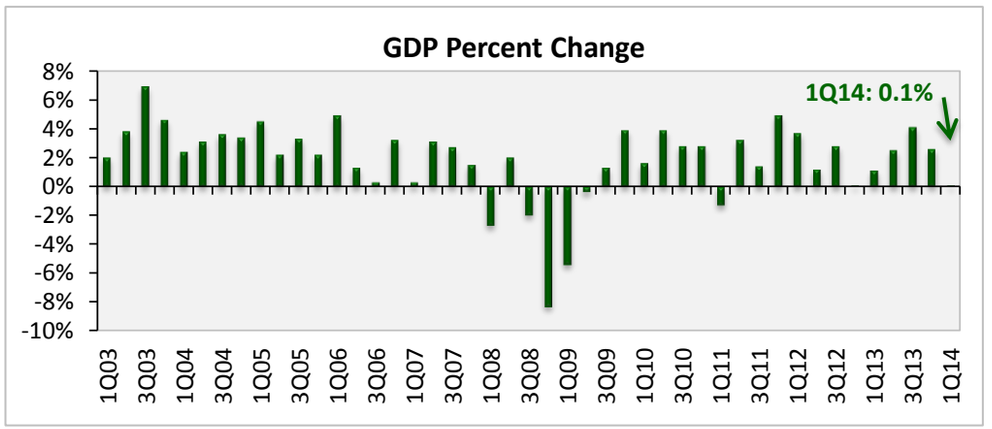
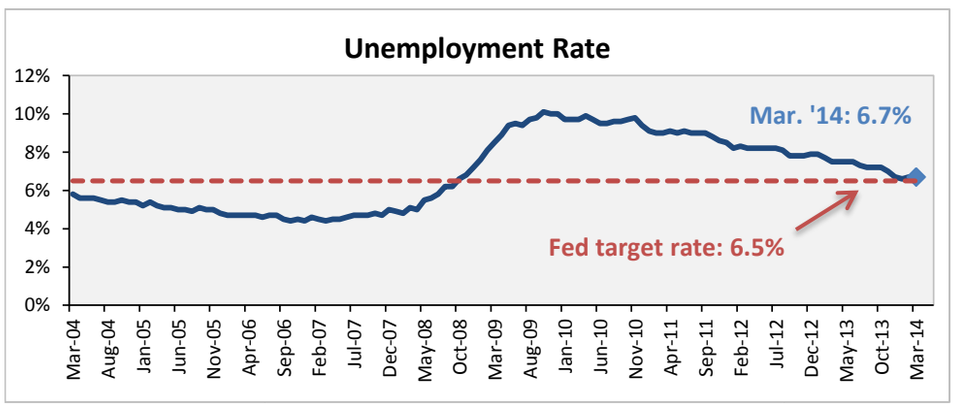
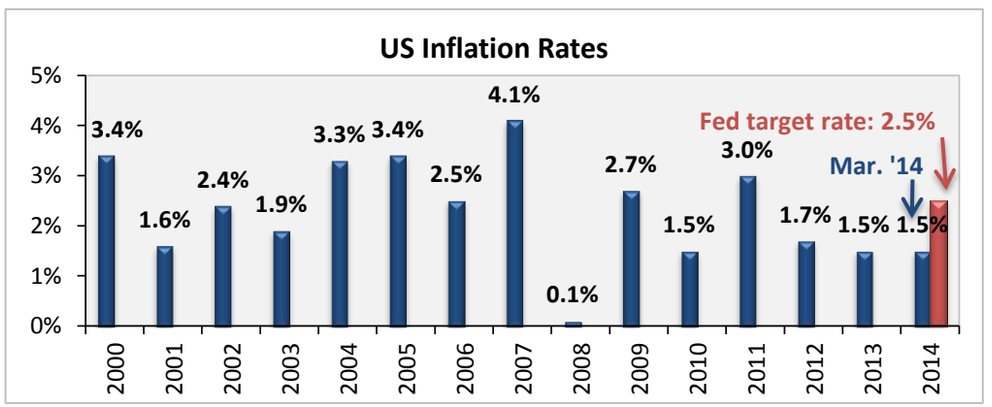
U.S. Economy

The U.S. economic recovery continues, but at a frustratingly sluggish pace as low job growth continues to restrict overall economic growth. Headline unemployment is unchanged from the end of the year at 6.7%, or about 10.7 million Americans. That, however, is not the entire story. Job growth slowed in the first quarter with an average of 129,000 jobs created per month vs. 205,000 average for the previous six months. The broader measure of unemployment, U-6, which includes part-time workers looking for a full-time job is at 12.7%. Some 7.4 million part-time workers would prefer a full-time job, and the balance are workers who have quit looking for work. It is reported that half of the unemployed are under age 35, which is the biggest consumer group. The lack of wages in this group is stifling consumer spending. The DOL also reports that the labor force participation rate is 63.2%, a 35 year low. Consumer confidence grew to 82.3% in March, up from 78.3% in January, but expectations by consumers were 50/50 believing that the economy was going to get better or worse. Weakness in existing home sales, particularly by first-time buyers, is an additional employment-related drag on the recovery. The Case-Shiller 20-city Home Price Index was down for the last three months in a row and was -0.2% for the 1st quarter, after a robust 13.2% gain in 2013. GDP growth, after three revisions, was at 2.6% for the fourth quarter, down from 4.1% in the 3rd quarter of last year. Inflation remains low at 1.5%. Short-term interest rates remain low and the Federal Reserve indicates they will keep them low through the balance of the year. The 10-year Treasury rate declined from just over 3.0% at year-end to 2.7% at the end of the quarter, pushing up bond prices. Commodity prices, which fell dramatically last year, rebounded in the first quarter, with gold up 6.7%, natural gas up 12%, pork products up 31%, corn up 17% and coffee up a whopping 58%.









U.S. Equity Market

We experienced a little bit of everything in the equity markets in the first quarter. We had a market decline from year-end through early February, followed by a recovery and new highs in early March. The S&P 500 finished the 1st quarter up 1.8%, but the Dow Jones Industrial Average was down 0.15% for the quarter. Mid-cap stocks out-performed both the large- and small-cap sectors, and value trumped growth. Earnings per share growth continues, but at a slower pace than last year. Earnings remain near all time highs, and 1,078 companies increased their dividend in Q1, the largest number since 1979. The average dividend yield on the S&P 500 is now 2.48%. Price/Earnings multiples are near long-term averages with the S&P 500 trailing P/E ratio at 17.7 times and forward P/E estimates at 15.6 times earnings. This would suggest that the market is fairly valued, but not necessarily over-valued. The nice thing about an average is that you know that about half the time the numbers were higher and about half the time the numbers were lower, so the equity pricing "glass" is either half-full or half-empty depending on your point of view. There has been a steady flow of assets from stocks to bonds since 2008, totaling about $1.3 trillion until last year when the trend reversed. About $5 billion has moved from bonds into equities and equity ETFs in the past 12 months. The REIT industry, which got crushed last year, staged a rebound and the Wilshire REIT Index was up 10.1% for the quarter. Utilities and Health Care have been the leading sectors in the S&P so far this year.

International Equity Market

The European economic woes and the Russia/Ukrainian crisis both plagued equity returns in the European Union. Stocks in France were up 3%, but Germany was off 0.3%, and the UK markets were off 0.8%. EU-imposed austerity programs have hurt GDP growth and unemployment remains high at about 12%, but interest rate cuts in most countries are being used as stimulus while inflation remains below 2%. In Asia, the economic slowdown in China was the big news in the first quarter; the Chinese equity markets were down 5.9% and Japan was down 5.5%. Emerging markets overall were down 0.4%, but variation was high among different EM countries: Brazil was up 2.9%, Russia down 14.5%, India up 8.2%, China down 5.9%, Mexico down 5% and Korea down 2%.

Bond Market

After five quarters of the 10-year Treasury yield moving up, and ending 2013 at just over 3%, the 10-year moved down to 2.73% in the 1st quarter, giving bond prices a boost. The entire yield curve flattened and the spread between the 10-year Treasury and the 30-year Treasury fell to a 5-year low. The Barclays US Aggregate Index was up 1.8% for the quarter, recovering much of its losses from last year. Duration has been extended due to the lower prepayment rates on mortgages, as mortgage rates continue an upward climb and housing price gains have slowed. High yield spreads declined to 358 basis points, driven by near historic low default rates and investors continuing to seek yield. The Barclays High Yield Ba/B (2% issuer capped) Index was up 2.9% for the quarter. Floating rate bank loans also saw spreads narrow and the S&P LSTA Leveraged Loan Index returned 1.4% for the quarter.

FOR ILLUSTRATIVE PURPOSES ONLY: For each index the current yield to worst as of 3/31/2014 was used as the base case annualized return. The annualized return sensitivity to a uniform increase or decrease in the yield curve was calculated by taking the index's Macaulay's (Modified) Duration as of 3/31/2014 multiplied by the percentage point change in the yield curve (basis point change divided by 100) and then appropriately adding or subtracting this implied percentage change in the value of the index (due to the shift in the yield curve) to the base case annualized return. This is a rough approximation of the annual return sensitivity to parallel shifts in the yield curve. **SOURCE:** PENN Capital Internal Research.

Real Estate Market

The returns on private real estate funds, as measured by the National Council of Real Estate Investment Fiduciaries (NCREIF) index of Open-Ended Diversified Core Equity (ODCE) funds, were up a little more than 3% per quarter in 2013, and NCREIF forecasts that trend to continue. Despite a substantial queue to get into most ODCE funds, the real estate industry has shown remarkable discipline in not over-paying for properties just to deploy capital. Although capitalization rates (Net Operating Income/Price), which is the inverse of a Price/Earnings ratio, have come down, they are still not at unreasonable levels. Publicly-traded REITs took a hit in 2013 but have recovered with a 10.1% return in the 1st quarter of 2014. The REIT Share Price to Net Asset Value (an estimate of the market value of the underlying real estate assets) is at about a 5% discount. REITs have seen this Share Price/NAV ratio go from -43.6% in the middle of the 2009 real estate crisis to about a 25% premium as investors stretched for high yielding stocks in subsequent years. REITs were still selling at a 15% premium to NAV in early 2013.

Hedge Fund of Funds Market

The hedge fund industry had a lot to deal with in the first quarter. Equity market volatility picked up with a correction in late January before reaching new highs. Bonds saw rates decline from year-end levels. Agricultural commodities staged a 16.5% rally from last years' declines (coffee up 58%), while heating oil and gas lost ground. The trend reversals whipsawed macro systematic and trend following strategies. Equity hedge strategies in the technology, healthcare and energy sectors had a good quarter, but short biased strategies were hurt by the end of the quarter equity rally. Fixed income relative value strategies seemed to work as rates declined and spreads narrowed during the quarter. In the event driven space, a slow quarter of M&A activity constrained merger arbitrage strategies, but distressed was aided by continuing low default rates, a recovering economy and rates declining. Activists had a lackluster quarter. Emerging market strategies struggled as China's economic slowdown hurt Asia. Japanese equities were off 5.5% for the quarter. Russia's annexation of Crimea hurt in Europe, where the Russian and Eastern Europe block of emerging markets were down 8.8% for the quarter.
