Calendar Year 2012 Summary

Utilization Management & Case Management Executive Summary

01/01/2012 – 12/31/2012

Prepared for:

FELRA & UFCW Health & Welfare Fund

"When you can control illness and injury, you can control expenses. Until that time, you can't control – but you can influence variables that encourage the right care at the right time, the right place, and at the right price.

The key to success is to look early and often at cases, and to utilize respected standards (Milliman) combined with competent staff. High utilization may be attributed to relatively few patients. Patients' utilization can often be positively influenced by appropriate use of case / disease management and aggressive utilization management."
