Investment Policy Statement.....	VI

February 5, 2020

Florida West Coast Operating Engineers
Apprenticeship Trust Fund
911 Ridgebrook Road
Sparks, MD 21152

Dear FWCOE Board of Director and administrators:

I have enclosed a review of the FWCOE Apprenticeship Trust portfolio for period ending 02/04/2020.

The portfolio closing value as of 02/04/2020 was \$959,734.96 with an estimated value including interest accruals through 02/04/2020 of \$4,092.76.

Interest accruals in a bond is interest the instrument has earned but has not yet distributed and received in the account. The accrued interest is not included in the performance report but would add additional performance if included (See Interest Accrual Detail).

Most of the fixed income securities actually distribute interest on a semi-annual basis. The current forward-looking gross distribution yield (before advisory fees) of the portfolio based (excluding money market) is 2.93 % or \$28,123.00 (see Cash Flow Report).

The portfolio does not have any securities on watch or of concern as of 02/04/2020. I have included the Investment Policy Statement (IPS) in the review for reference.

I can be available via teleconference if there are any questions.

Sincerely,

Tony DuBose, AIF®

About Us

About Legacy Wealth Management

Legacy Wealth Management is committed to helping clients find financial solutions through independent and comprehensive financial planning, tailored investment management approaches, and personalized, personal customer service.

Based in Plantation, Florida, our firm's three locations serve clients in Miami-Dade, Broward, and Palm Beach counties as well as clients across the United States. Our financial professionals have over 150 years of combined experience in the financial industry, providing clients an extensive understanding of complex financial matters.

Our mission is to have positive impact on the lives of our clients and their families by delivering personalized planning solutions and ongoing service far exceeding their expectations. This mission is deeply grounded in our core values of integrity and transparency.

We abide by the fiduciary standard, putting our clients' best interests at the forefront of our work. We strive to be your trusted guide and resource as you pursue your financial goals.

Your Advisor

Tony DuBose is the co-founder and Managing Principal of Legacy Wealth Management. Tony has assisted individuals, families, and institutions in pursuing their financial goals for over 20 years. His primary goal as a wealth advisor is to understand each client's unique needs and goals, and to advocate for his clients' best interests. He is Chief Investment Officer (CIO) of the firm, working with the investment committee to determine and execute key investment strategies.

"As an avid pilot, I relate much of flying a plane to investment management. Both are about knowing, understanding, and mitigating risks. Both are about keeping calm and alert in moments of sudden change. And both are about getting to where you want to go."

Tony enjoys expanding his knowledge of the latest in business development, client service, and critical investment advisory activities through his annual attendance of LPL Financial's Advisory Leaders Forum, an exclusive three-day academic experience held at such universities as Duke and Northwestern's Kellogg School of Management.

Tony graduated from Valdosta State University in 1983. He enjoys using his aviation skills to complete humanitarian missions for various nonprofit organizations. He also serves on the Board of the Circle of Friends of the NSU Alvin Sherman Library. He resides in Davie with his family.

Portfolio Compass

NAVIGATING THE MARKETS

The *Portfolio Compass* provides a snapshot of LPL Research's views on equity, equity sectors, fixed income, and alternative asset classes. This monthly publication illustrates our current views and will change as needed over a 3- to 12-month time horizon.

The top down is an important part of our asset allocation process. As a result, we have a macro section including our views of the global economy and key drivers of those views, and a section on what we are watching that might change those views.

CONTENTS

All performance referenced herein is as of December 16, 2019, unless otherwise noted.

COMPASS CHANGES

- Downgraded real estate view from neutral/positive to neutral
- Downgraded investment-grade corporate bonds from neutral/positive to neutral

INVESTMENT TAKEAWAYS

- Our S&P 500 Index year-end 2020 fair value target range of 3,250–3,300 is based on a price-to-earnings (P/E) ratio of 18.75 and our 2020 S&P 500 earnings forecast of \$175 per share.
- Attractive valuations and solid economic growth favor emerging markets over developed foreign markets. The trade deal with China is supportive even though trade risk remains.
- Fundamentals and yields appear good in real estate, but interest-rate sensitivity and our preference for cyclical sectors lead to our neutral view.
- Slower but still solid economic growth and modest inflation may put upward pressure on yields, but trade uncertainty and the global appetite for U.S. Treasuries increase the likelihood they remain range bound.
- We emphasize a blend of high-quality intermediate bonds, with an emphasis on mortgage-backed securities (MBS) and underweight exposure to U.S. Treasuries in suitable strategies. MBS could provide a diversifying source of yield within the investment-grade space that may tolerate modestly rising rates better than other options.
- High-yield corporates could be an attractive alternative to equities on a risk-adjusted basis.
- While economic growth is supportive of investment-grade corporates, tight credit spreads and declining credit quality lead to our neutral view.
- The global bull market continues, as the MSCI All Country World Index set a new record high in the past month, surpassing its January 2018 peak. Financials outperformance and breakout above pre-financial crisis levels strengthen the bull case, as investors continue to rotate into more cyclical sectors.

BROAD ASSET CLASS VIEWS

LPL Research's views on stocks, bonds, cash, and alternatives are illustrated below.

MACROECONOMIC VIEWS

	Economic Factor	Outlook	Investing Impact
ECONOMY	U.S. GDP Growth	Our preliminary GDP forecast for 2020 is 1.75%.*	Absence of a recession would likely support equity markets despite slower growth.
	Consumer Spending	A strong labor market and stock gains may help.	Consumer spending remains a growth driver during business spending soft patch.
	Business Spending	Some support from fiscal stimulus still in place, but trade uncertainty an offset.	May improve with some progress on trade, with industrials the potential beneficiary.
	Housing	Lower rates, growing inventory are helping, but home prices limiting upside.	Demographic pressures building, but full rebound may be delayed until next cycle.
	Import/Export	Service sector exports strong; uncertainty around trade.	May support technology and business services; some uncertainty for multinationals.
	Labor Market	Unemployment near multidecade low; wage gains support consumer spending.	Wages may start to pressure profit margins; Fed watching closely but not at worrisome levels.
	Inflation	Still contained despite modest wage pressure.	Interest rates may rise if trade picture clears up, but only gradually.
	Business Cycle	Some late cycle signs but economy not overheating.	Equity markets may have room to run, but volatility may continue.
	Dollar	Upward trend has continued, but some signs of flattening.	A flat to lower dollar would support international equity and bond returns for U.S. investors.
	Global GDP Growth	Signs of stabilization, but trade uncertainty remains a risk.	May contribute to equity volatility but potential opportunities for global multinationals.
POLICY	Fiscal	Impact of tax reform and deregulation limited by trade policy.	Fiscal policy still market friendly, but expecting continued bouts of volatility.
	Monetary	"Insurance" rate cuts are supportive, but Fed has likely paused to see impact.	May support markets as long as inflation remains contained.
	Government	Potential for monetary or fiscal policy mistake increasing as economy slows.	Markets may have room to run, but important to monitor target risk levels.
RISKS	Financial	Targeted deregulation reasonable with systematic risk lower than prior cycle.	Short term positive; longer term may enable economic and market excesses to build.
	Geopolitical & Other	China, trade, Brexit remain in focus. Also watching Middle East tensions.	May contribute to higher stock volatility.
OVERSEAS	Developed Overseas	Anti-Eurozone populism, Brexit uncertainty, slower growth are concerns.	Potential diversification benefits, but returns may lag United States.
	Emerging Markets	Trade risk remains; there are pockets of stress, but emerging markets growth outlook overall still looks good.	Low valuations and strong growth offer emerging markets upside potential once trade situation is resolved.
FINANCIAL CONDITIONS	Corporate Profits	Modest gains in 2020.	We see S&P 500 appreciation consistent with earnings gains in 2020.
	Main Street	Policy uncertainty impacting sentiment, but may be starting to rebound.	Supports cyclical sector performance.

The opinions voiced in this material are for general information only and are not intended to provide or be construed as providing specific investment advice or recommendations for your clients. Any economic forecasts set forth in the presentation may not develop as predicted and there can be no guarantee that strategies promoted will be successful.

*Our forecast of GDP growth of near 1.75% is slightly below our long-term baseline, which is based on labor force and productivity trends, due to the frictional impact of trade policy uncertainty, slower global growth, and the waning impact of fiscal stimulus. Economic growth is affected by changes to inputs such as business and consumer spending, housing, net exports, capital investments, and government spending.

ASSET CLASS & SECTOR TOP PICKS

Below we provide our top overall ideas across the various asset classes and sectors covered in this publication, as well as our best ideas within the three disciplines of our investment process: fundamentals, technicals, and valuations. More details on these and other investment ideas can be found on subsequent pages.

Neutral	■	●	
Positive/Neutral		●	
Positive	■	●	
Previous Position	⌚		

Global macro strategy is a hedge fund strategy that selects its holdings primarily on the macroeconomic and political views of various countries, and is subject to numerous risks such as: geopolitical, derivative, commodity, volatility, currency, and regulatory.

Long/short equity strategies are subject to normal alternative investment risks, including potentially higher fees, while there is additional management risk, as the manager is attempting to accurately anticipate the likely movement of both their long and short holdings. There is also the risk of "beta-mismatch," in which long positions could lose more than short positions during falling markets.

EQUITY ASSET CLASSES

Our S&P 500 Index year-end 2020 fair value target range of 3,250–3,000 is based on a P/E ratio of 18.75 and our 2020 S&P 500 earnings forecast of \$175 per share. We favor large caps as the business cycle ages. We recommend balanced exposure between the growth and value styles amid various crosscurrents. Relative valuations favor value stocks, but the interest-rate environment and slowing economic growth may favor growth. Our positive emerging markets view is based on solid economic growth, favorable demographics, and attractive valuations, with potential upside from additional progress on trade with China following the phase-one agreement.

	Asset Class	F	T	V	–	○	+	Rationale
Style/Capitalization	Large Growth	■	■	■	—	—	●	We favor large caps over small as the business cycle ages. The latest de-escalation of U.S.-China trade tensions may help large caps. Relative valuations favor value stocks, but the interest-rate environment and slowing economic growth may favor growth.
	Large Value	■	■	■	—	—	●	
	Mid Growth	■	■	■	—	●	—	Mid cap valuations are attractive relative to large caps, but earnings growth doesn't stand out. Slower economic growth and the interest-rate environment favor growth, but valuations favor value.
	Mid Value	■	■	■	—	●	—	
	Small Growth	■	■	■	●	—	—	As the economic cycle ages in 2020 and financial conditions potentially tighten, small caps may struggle to keep up with large cap stocks. Further progress on trade following the phase-one agreement with China may benefit larger cap companies.
	Small Value	■	■	■	●	—	—	
Region	United States	■	■	■	—	●	—	Among developed markets, we remain U.S. focused, supported by relatively stronger—albeit slower—economic growth, low inflation, modest earnings growth, and Fed rate cuts.
	Large Foreign	■	■	■	●	—	—	Our concerns about global policies, economies, and interest rates translate into our preference for emerging-markets stocks over international developed-market stocks. Fiscal deficits, populism, and exhausted monetary policies could weigh on sentiment, spending, and investment in Europe, structural reforms and the recent consumer tax hike may pressure sentiment in Japan.
	Small Foreign	■	■	■	●	—	—	
	Emerging Markets	■	■	■	—	—	●	Attractive valuations and solid economic growth favor emerging markets over developed foreign markets. The phase-one trade deal with China is supportive, even though we acknowledge the risk of re-escalation in trade tensions likely will remain elevated throughout 2020.
MLPs	Master Limited Partnerships	■	■	■	●	—	—	Pockets of fundamental weakness and year-end tax-related selling pressure have outweighed attractive yields and strong U.S. energy production.

Investing in master limited partnerships (MLPs) involves additional risks as compared with the risks of investing in common stock, including risks related to cash flow, dilution, and voting rights. MLPs may trade less frequently than larger companies due to their smaller capitalizations, which may result in erratic price movement or difficulty in buying or selling. MLPs are subject to significant regulation and may be adversely affected by changes in the regulatory environment, including the risk that an MLP could lose its tax status as a partnership. Additional management fees and other expenses are associated with investing in MLP funds.

EQUITY SECTORS

We continue to prefer cyclical sectors for the U.S. economic expansion, which we expect will continue through 2020. Technology continues to lead this bull market. We expect industrials to benefit from the U.S.-China trade deal and a potential pickup in capital spending. Our neutral real estate view is driven by interest-rate sensitivity and our preference for cyclical sectors. The recent steepening of the yield curve is encouraging, but the interest rate outlook remains challenging for the financials sector and leads us to a neutral view for now.

Sector		F	T	V	⊖	○	⊕	S&P*	Rationale
Cyclical	Materials	■	■	■	●			2.7	The U.S.-China trade deal, stabilizing global growth, weaker U.S. dollar, and rising copper prices have our attention, but we would like to see better performance.
	Energy	■	■	■	●			4.4	We see limited upside for oil near \$60 per barrel given the U.S. supply overhang, although the U.S.-China trade deal and weaker U.S. dollar help.
	Industrials	■	■	■		●		9.3	Positive drivers include the U.S.-China trade deal, stabilizing global economic growth, and prospects for more business investment. Valuations remain very reasonable.
	Communication Services	■	■	■		●		10.4	High valuations, regulatory risk for internet companies, and defensive telecom exposure keep us neutral despite a strong earnings outlook and economic sensitivity.
	Consumer Discretionary	■	■	■		●		10.2	Though valuations are rich, robust consumer spending and still-low interest rates are beneficial.
	Technology	■	■	■		●		22.3	Solid spending in areas targeting productivity enhancements, focusing on mobile, cloud computing, automation, and artificial intelligence (AI). Earnings lull may be temporary.
	Financials	■	■	■		●		12.8	Difficult interest-rate environment remains, but recent backup in yields and steepening yield curve help; valuations and dividend payouts are supportive. Positive bias.
Defensive	Utilities	■	■	■	●			3.5	We continue to favor cyclical sectors, valuations are high, and we expect interest rates to rise, albeit gradually.
	Healthcare	■	■	■		●		13.6	Ebbing policy risk recently has given the sector a lift. Positive bias driven by a solid healthcare spending outlook, favorable demographics, and attractive valuations.
	Consumer Staples	■	■	■	●			7.6	Our preference for cyclical sectors, sluggish growth, and rich valuations offset attractive yields.
	Real Estate	■	■	■		●	●	3.2	Sound fundamentals and rich yields, but interest-rate sensitivity and our preference for cyclical sectors lead to our neutral view.

* S&P 500 Weight (%)

Investing in real estate/REITs involves special risks such as potential illiquidity and may not be suitable for all investors. There is no assurance that the investment objectives of this program will be attained.

Because of its narrow focus, specialty sector investing, such as healthcare, financials, or energy, will be subject to greater volatility than investing more broadly across many sectors and companies.

There is no guarantee that a diversified portfolio will enhance overall returns or outperform a nondiversified portfolio. Diversification does not ensure against market risk.

FIXED INCOME

Maintaining a more cautious approach as we move later cycle, but still prefer corporate bonds to government bonds.

Recommended interest rate sensitivity is still lower than the benchmark due to a modest bias toward rates rising, relatively attractive shorter-term yields.

Yield spread is the difference between yields on differing debt instruments, calculated by deducting the yield of one instrument from another. The higher the yield spread, the greater the difference between the yields offered by each instrument. The spread can be measured between debt instruments of differing maturities, credit ratings, and risk.

Sector		F	T	V	⊖	○	⊕	Rationale
Tax-Free Bonds	Munis—Short-Term	■	■	■	■	●	■	Supply dynamics attractive. Less volatile than longer maturity, but potential diversification benefits are more limited.
	Munis—Intermediate-Term	■	■	■	■	●	■	Valuations relative to U.S. Treasuries have improved. Supply dynamics still look attractive.
	Munis—Long-Term	■	■	■	■	●	■	Valuations neutral relative to Treasuries, but absolute levels looking more expensive. Higher rate sensitivity may be a headwind if rates rise. Supply dynamics remain attractive.
	Munis—High-Yield	■	■	■	■	●	■	Remaining more cautious as we move later cycle. Some long-term headwinds from pension obligations. Supply dynamics remain attractive. Low yields for sector on an absolute basis.

(Continued on next page)

For the purposes of this publication, intermediate-term bonds have maturities between 3 and 10 years, and short-term bonds are those with maturities of less than 3 years.

All bonds are subject to market and interest rate risk if sold prior to maturity. Bond values will decline as interest rates rise and are subject to availability and change in price.

High-yield/junk bonds are not investment-grade securities, involve substantial risks, and generally should be part of the diversified portfolio of sophisticated investors.

Municipal bonds are subject to availability, price, and market and interest rate risk if sold prior to maturity. Bond values will decline as interest rates rise. Interest income may be subject to the alternative minimum tax. Federally tax-free but other state and local taxes may apply.

Corporate bonds are considered higher risk than government bonds but normally offer a higher yield and are subject to market, interest rate, and credit risk, as well as additional risks based on the quality of issuer coupon rate, price, yield, maturity, and redemption features.

FIXED INCOME (CONTINUED)

We continue to emphasize a blend of high-quality intermediate bonds in tactically oriented portfolios with an emphasis on MBS. We expect modest rate pressure in 2020 helped by stabilizing growth, but inflation remains contained. Compensation for longer maturity bonds remains unattractive. Growth still sufficient to support corporate profits, and interest coverage remains solid, but valuations appear less attractive as credit spreads narrow. We maintain a cautious approach with credit-sensitive areas of the market, but a “coupon-clipping” environment may still aid suitable investors.

Asset Class		F	T	V	⊖	○	⊕	Rationale
Taxable Bonds – U.S.	Treasuries	■	■	■	●			Yield spreads to international sovereigns remain elevated but hedging costs lower attractiveness. Supply, economic growth, and inflation normalization could be headwinds. Other options look more attractive.
	TIPS	■	■	■		●		Break-even inflation rates still appear modestly attractive, but slower growth, low yield limit upside.
	Mortgage-Backed Security	■	■	■		●		Diversifying source of yield among high-quality options.
	Investment-Grade Corporates	■	■	■		●	●	We still find incremental value in corporate bonds due to the economic backdrop. Tight credit spreads and overall credit quality a concern.
	Preferred Stocks	■	■	■		●		Fundamentals are firm for U.S. banks. Higher interest rate sensitivity remains a risk.
	High-Yield Corporates	■	■	■		●		Yields remain attractive and economy supportive, but a less effective diversifier than higher-quality options. Credit spreads have tightened.
	Bank Loans	■	■	■	●			Weaker investor protections and end of rate hikes for now decrease attractiveness. Economy remains supportive.
Taxable Bonds – Foreign	Foreign Bonds–Hedged	■	■	■	●			Rich valuations, risk from rising rates may pressure performance.
	Foreign Bonds–Unhedged	■	■	■	●			Potential currency volatility, low yields, and unattractive valuations are negatives.
	Emerging Markets Debt	■	■	■		●		Dovish central banks improve the valuation picture. Trade policy and geopolitical tensions remain risks.

Investing in foreign and emerging market debt securities involves special additional risks. These risks include, but are not limited to, currency risk, geopolitical and regulatory risk, and risk associated with varying settlement standards.

Mortgage-backed securities (MBS) are subject to credit, default, prepayment risk that acts much like call risk when you get your principal back sooner than the stated maturity, extension risk, the opposite of prepayment risk, market and interest rate risk.

Bank loans are loans issued by below investment-grade companies for short-term funding purposes with higher yield than short-term debt and involve risk.

Treasury Inflation-Protected Securities, or TIPS, are subject to market risk and significant interest rate risk as their longer duration makes them more sensitive to price declines associated with higher interest rates.

COMMODITIES & ALTERNATIVE ASSET CLASSES

Slowing global growth has been a drag, but U.S.-China trade progress has helped industrial metals' performance show some signs of life recently. Fed rate cuts, trade uncertainty, geopolitical risk, and technical momentum are all supportive of precious metals. It's difficult to envision a new near-term positive catalyst for oil prices after the September Saudi supply disruption had limited sustained impact. The event-driven investing outlook remains promising as tax reform and healthy deal flow support the corporate activity opportunity set.

	Asset Class	F	T	V	⊖	○	⊕	Rationale
Commodities	Industrial Metals	■	■		●			Slowing global growth has weighed, but trade progress has helped some recently. Odds of a U.S. infrastructure bill are near zero amid impeachment inquiry.
	Precious Metals	■	■			●		Fed rate cuts, trade uncertainty, geopolitical risk, and technical momentum are supportive.
	Energy	■	■		●			It's difficult to envision a new near-term positive catalyst for oil prices after the massive Saudi supply disruption in September had limited sustained impact.
	Agricultural	■	■		●			Trade progress including Chinese agriculture purchases has helped, but long-term downtrend remains in place.

	Sector	T	E	C	T	V	O	⊖	○	⊕	Rationale
Alternatives	Long/Short Equity	■	■	■					●		Over the past month, strategies have benefited from marginally adding to their long equity exposure, specifically within cyclical sectors. We continue to prefer strategies with balanced risk profiles, as well as those that have flexible net exposure mandates to capitalize on market volatility.
	Event Driven	■	■	■					●		Merger arbitrage continues to provide attractive risk-adjusted returns with limited directional equity exposure. Deal flow remains healthy with high management confidence, low interest rates, and significant private equity capital available for deployment.
	Managed Futures	■	■	■					●		Recent performance has been supported by long equity exposure, with mixed results stemming from short fixed-income exposure. We favor multi-managers or combinations of uncorrelated trading strategies to smooth, diversify return profiles.
	Global Macro	■	■	■					●		Global macro strategies continue to provide diverse exposure sets and have provided attractive downside protection during equity sell-offs. Shifts in fiscal policy, global political uncertainty, and economic divergences provide an attractive opportunity set.

	CHARACTERISTICS	ICON	DEFINITION
LEGEND	Catalysts	C T	Potential for favorable macroeconomic and/or idiosyncratic market developments that may benefit the investment strategy.
	Trading Environment	T E	Market characteristics present sufficient investment opportunities for this investment style.
	Volatility	V O	The current volatility regime provides a constructive environment that an investment of this style can capitalize on.

Alternative strategies may not be suitable for all investors and should be considered as an investment for the risk capital portion of the investor's portfolio. The strategies employed in the management of alternative investments may accelerate the velocity of potential losses.

Commodity-linked investments may be more volatile and less liquid than the underlying instruments or measures, and their value may be affected by the performance of the overall commodities baskets as well as weather, geopolitical events, and regulatory developments.

IMPORTANT DISCLOSURES

All performance referenced is historical and is no guarantee of future results.

There is no assurance that the techniques and strategies discussed are suitable for all investors or will yield positive outcomes. The purchase of certain securities may be required to effect some of the strategies.

All indexes are unmanaged and cannot be invested into directly. Unmanaged index returns do not reflect fees, expenses, or sales charges. Index performance is not indicative of the performance of any investment.

Stock and Pooled Investment Risks

The payment of dividends is not guaranteed. Companies may reduce or eliminate the payment of dividends at any given time.

Investing in stock includes numerous specific risks including: the fluctuation of dividend, loss of principal, and potential illiquidity of the investment in a falling market.

Investing in foreign and emerging markets securities involves special additional risks. These risks include, but are not limited to, currency risk, geopolitical risk, and risk associated with varying accounting standards. Investing in emerging markets may accentuate these risks.

The prices of small and mid cap stocks are generally more volatile than large cap stocks.

Bond and Debt Equity Risks

Government bonds and Treasury bills are guaranteed by the U.S. government as to the timely payment of principal and interest and, if held to maturity, offer a fixed rate of return and fixed principal value. However, the value of fund shares is not guaranteed and will fluctuate.

Bond yields are subject to change. Certain call or special redemption features may exist which could impact yield.

Alternative Risks

Event-driven strategies, such as merger arbitrage, consist of buying shares of the target company in a proposed merger and fully or partially hedging the exposure to the acquirer by shorting the stock of the acquiring company or other means. This strategy involves significant risk as events may not occur as planned and disruptions to a planned merger may result in significant loss to a hedged position.

Managed futures strategies use systematic quantitative programs to find and invest in positive and negative trends in the futures markets for financials and commodities. Futures and forward trading is speculative, includes a high degree of risk that the anticipated market outcome may not occur, and may not be suitable for all investors.

INDEX DEFINITIONS

The S&P 500 Index is a capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

DEFINITIONS

A cyclical stock is an equity security whose price is affected by ups and downs in the overall economy. Cyclical stocks typically relate to companies that sell discretionary items that consumers can afford to buy more of in a booming economy and will cut back on during a recession.

Duration is a measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. It is expressed as a number of years. Rising interest rates mean falling bond prices, while declining interest rates mean rising bond prices. The bigger the duration number, the greater the interest rate risk or reward for bond prices.

Credit ratings are published rankings based on detailed financial analyses by a credit bureau specifically as it relates to the bond issue's ability to meet debt obligations. The highest rating is AAA, and the lowest is D. Securities with credit ratings of BBB and above are considered investment grade.

Credit Quality is one of the principal criteria for judging the investment quality of a bond or bond mutual fund.

Gross domestic product (GDP) is the monetary value of all the finished goods and services produced within a country's borders in a specific time period, though GDP is usually calculated on an annual basis. It includes all of private and public consumption, government outlays, investments and exports less imports that occur within a defined territory.

Technical analysis is a methodology for evaluating securities based on statistics generated by market activity, such as past prices, volume and momentum, and is not intended to be used as the sole mechanism for trading decisions. Technical analysts do not attempt to measure a security's intrinsic value, but instead use charts and other tools to identify patterns and trends. Technical analysis carries inherent risk, chief amongst which is that past performance is not indicative of future results. Technical analysis should be used in conjunction with Fundamental analysis within the decision-making process and shall include but not be limited to the following considerations: investment thesis, suitability, expected time horizon, and operational factors, such as trading costs are examples.

The PE ratio (price-to-earnings ratio) is a measure of the price paid for a share relative to the annual net income or profit earned by the firm per share. It is a financial ratio used for valuation: a higher PE ratio means that investors are paying more for each unit of net income, so the stock is more expensive compared to one with lower PE ratio.

Earnings per share (EPS) is the portion of a company's profit allocated to each outstanding share of common stock. EPS serves as an indicator of a company's profitability. Earnings per share is generally considered to be the single most important variable in determining a share's price. It is also a major component used to calculate the price-to-earnings valuation ratio.

Idiosyncratic risk can be thought of as the factors that affect an asset such as a stock and its underlying company at the microeconomic level. Idiosyncratic risk has little or no correlation with market risk, and can therefore be substantially mitigated or eliminated from a portfolio by using adequate diversification.

Risk Return Analysis

Three Year Trailing: 02/04/2017-02/04/2020

Risk & Return

A graphical look at the historical risk and return of your portfolio and benchmark(s). This chart graphically represents the 3-year annualized risk and return data.

For the returns of fixed income holdings, the asset class respective benchmark is used.

The 3-Month Treasury Bill Index is used to represent the returns of cash and equivalent holdings.

The measure used to represent the risk is the standard deviation of returns.

This is a hypothetical example and is not representative of any specific situation. Your results will vary.

Portfolio	Risk	Return
2-Bloomberg Barclays US Government 1-3 Year Tot Return Index	1.08%	1.86%
1-Portfolio *	2.02%	3.37%
4-Bloomberg Barclays US Aggregate Total Return Index	2.68%	4.03%
3-S&P/Citigroup U.S. Broad Investment Grade Index	2.72%	4.08%

* Securities without the selected date range of history are not included in the above portfolio. This may change the intended portfolio weights and may not be representative of the investment objective. Please only choose investments with history during the selected date range.

The investment products sold through LPL Financial are not insured Bank/Credit Union deposits and are not FDIC insured. These products are not obligations of the bank/ credit union and are not endorsed, recommended or guaranteed by bank/credit union or any government agency. The value of the investment may fluctuate, the return on the investment is not guaranteed, and loss of principal is possible.

LPL "Official" Statements: This is **not** an official LPL Financial ("LPL") statement, it has been prepared by your Advisor for informational purposes only, and does not replace the statements you should receive directly either from LPL or from the investment sponsors for which LPL is the broker-dealer of record or any other outside custodian. It is intended to estimate the total value of your investments for which you receive such statements, as well as any investments held away from LPL about which you have provided to your Advisor information from which values can be estimated. This report has been prepared from data believed to be reliable but no representation is being made as to its accuracy or completeness.

The report includes securities held in your LPL account(s) or that LPL does not hold on your behalf and which are not included on LPL's books and records. These outside positions are securities held directly by an outside sponsor rather than in an LPL account. There may be differences in the way each outside securities position is reflected based on the various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside securities positions. Information regarding outside securities positions may be limited because it is provided by a third party source.

The combined total Market Value represents the combination of various sources and types of accounts. This combined total is subject to any error of any of the types of data sources that may be contributing to it, including manual entry errors and data reliability or completeness errors. Values shown should only be used as a general guide to portfolio value, and may vary from the actual liquidation values. Accounts held away from LPL are not covered by LPL's SIPC insurance. The LPL Financial SIPC Membership provides account protection only to those assets held at LPL. To the extent some of the other entities may be SIPC members, please contact your financial advisor or the other entity or refer to the other entity's statement regarding SIPC membership. Position values, size of positions, and dates, may be estimates made by your Advisor based on information you have provided. The information contained in this report should not be relied upon for tax reporting purposes, accounting, or valuation purposes. The source of all price information for tracked positions is one or more third party vendors and may include the use of substitute prices where prices are not readily available.

Past performance is no guarantee of future results. Current values may be lower or higher than the values shown. We urge you to compare the information (e.g. market values, transactions, inflows, outflows, and fees) in this report with the information provided in the account statements you receive directly LPL Financial, the investment sponsor, or custodian of the assets. If you are not receiving statements from your custodian, please contact your custodian directly or call LPL Financial at 800-877-7210 extension 6422.

Dynamic Reporting: Unlike your monthly statement, this Report is generated for you by your advisor on an on-demand basis. This could mean that events not captured on your last monthly statement may be reflected on this report and therefore values on the two documents may not match. Whereas a monthly statement is a static documents, this Report incorporates retroactive adjustments which are routinely posted to your account(s). An example of a routine, retroactive adjustment is dividend payments. Dividends you earn at the end of the month may not be posted to your account until several days into the subsequent month. Such dividends would not be reflected in the value of your monthly statement as those dividends would not have been paid into the account at the time your statement was created. This Report run sometime after the dividends are posted to your account would reflect the value of those dividends at the end of the month.

Performance Calculations: Performance return figures are expressed as a percentage and include the impact of the deduction of any advisory fees and transaction charges. Unless otherwise stated, performance returns are cumulative. Three different methods, time-weighted (TWR), money-weighted (IRR) and return-on-investment (ROI) are displayed on reports. The Advisory Performance Report, uses a time-weighted return. The remaining performance reports use a time-weighted return, money-weighted return or return-on-investment. The return method used on these reports is clearly labeled and can be configured by your Financial Advisor. The time-weighted method is used to depict an account's relative rate of return, is not sensitive to contributions and withdrawals into and out of the account, and, as compared to the money-weighted method, allows clients to better compare performance against other money managers. The money-weighted return method is used to depict an account's personal rate of return, accounts for all contributions and withdrawals into and out of the account, and, as compared to the time-weighted method, better represents the client's actual investment experience during the evaluation period. When compared to the other options, return-on-investment is focused more on accounting and less on performance analysis. ROI is simply your net gain/loss (aka net change aka investment returns) expressed as a percentage of total money invested. Below is an example to clarify the difference of these three methods:

Example: Two investors begin by buying 100 shares at the end of the year's price (\$10), starting off with \$1,000. The first investor makes two subsequent purchases of 100 shares each, one at the end of May (\$14) and the other at the end of August (\$15). The second investor also makes two additional purchases of 100 shares each, but hers are at the end of April (\$8) and September (\$9). The price of the security at the end of the year is \$11, meaning the security is up 10%. The first investor shows a loss of \$600, while the second shows a gain of \$600. The time-weighted return for each investor is +10%. The money-weighted return for the first investor is -24.81% and the second investor is +35.04%. In this case, return-on-investment is -15.38% for the first investor and +22.22% for the second.

	Investor 1	Investor 2
	Dec: 100 Shares @ \$10/s	Dec: 100 Shares @ \$10/s
	May: 100 Shares @ \$14/s	Apr: 100 Shares @ \$8/s
	Aug: 100 Shares @ \$15/s	Sept: 100 Shares @ \$9/s
Net Invested	\$3,900.00	\$2,700.00
Ending Value	\$3,300.00	\$3,300.00

Net Change	-\$600.00	\$600.00
	Investor 1 Returns	Investor 2 Returns
Time Weighted (TWR)	10.00%	10.00%
Money Weighted (IRR)	-24.81%	35.04%
Return on Investment (ROI)	-15.38%	22.22%

If performance cannot be calculated for a period within the report timeframe, graphs will display a flat line and returns will display "N/A" or "-". For third party advisory programs (TMP), and outside custodians (CST), the above-noted performance calculations may differ from the methodologies used at the current or prior firm or custodian.

Fee-based Accounts: The figures for these accounts reflect the deduction of investment advisory fees. If the investment is being managed through a fee-based account or agreement, the returns are reduced by those applicable advisory fees. Refer to your Advisor’s Form ADV, Part II for more information.

Outside Positions: Outside positions are securities held directly by an outside sponsor rather than in an LPL account. They include positions held in accounts identified in the "Location" column with a term other than "LPL." There may be differences in the way each outside position is reflected based on these various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside positions. Information regarding outside positions may be limited because it is provided by a third party source.

Standard Benchmarks: Indices and benchmarks are unmanaged and cannot be invested into directly. For additional information regarding the indices that may be displayed, please contact your Financial Advisor. Benchmark returns may not correspond exactly to the benchmark returns displayed on LPL advisory performance reports or statements.

If returns shown in a report are calculated according to the time-weighted method, returns for the benchmark will be shown based on the simple method. The simple method tracks the return of the benchmark during the reporting period without regard to the timing and value of any additions or withdrawals from your account.

If returns shown in a report are calculated according to the money-weighted method, returns for the benchmark may be shown either based on the simple method or the money-weighted method. A money-weighted benchmark return generally seeks to represent how a hypothetical investment in the benchmark would have performed based on the cash flows in your account. Because money-weighted benchmarks are based on the cash flows in your account, the benchmark returns shown in the report are not likely to be comparable to the published returns for the same benchmark.

Income: Projected income totals shown are estimated and are rounded to the nearest dollar. Total values may reflect rounding discrepancies. If information is not available to calculate income on certain securities, those income generating securities will not be displayed on the report.

Money Market Funds: Money market fund investments are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the funds seek to preserve a value of \$1.00 per share, it is possible to lose money in money market funds.

Est. Income -Estimated Annual Income (EAI): For positions with annual dividends, the Estimated Annual Income is calculated by taking the annual dividend and multiplying by the number of shares owned. If dividends are more or less frequent, the dividend rate is multiplied by the frequency of the dividend and the number of shares owned. If no rate is available, no EAI numbers will be generated. EAI for certain types of securities could include a return of principal or capital gains in which case the EAI would be overstated. EAI is an estimate and the actual income and yield might be lower or higher than the estimated amounts. Additionally the actual dividend or yield may vary depending on the security issuers’ approval of paying the dividends. **Yield On Cost:** is your annual estimated income expressed a percentage of the cost of your investment. This metric can show you how efficiently your investments are earning income based on your purchase price and when compared to current-yield can often showcase the growth in income payments over time. Yield on cost cannot be used to compare with the yield of an investment alternative's stated yield. For such a comparison, refer to your investment’s current yield.

Holdings Sources: Positions held in your LPL account(s) are indicated with "LPL". The terms "Outside", "CST", "TMP" or a "sponsor's name" refer to securities held or by an investment sponsor or custodian that has agreed to electronically provide information to LPL about your holdings. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices for prices that are not readily available. For certain securities such as illiquid securities, pink sheet stocks, bulletin board stocks, and fixed income positions, substitute prices used in calculating performance and displayed on the report maybe prices based on trades occurring prior to the date of the missing prices. The source of all quantity information for these holdings is LPL, the prior custodian or the investment sponsor carrying your account. "TMP" represents accounts managed by an investment firm other than LPL as part of a third party advisory program. TMP accounts are held away from LPL and are not covered by LPL's SIPC Insurance. For TMP accounts, LPL's role is limited to a referral to the third party investment firm and LPL do not serve as broker-dealer. TMP accounts have not been verified by LPL. The source of all price information is the third party investment firm, a custodian or a third party vendor. "CST" represents accounts held by an outside custodian and not held or a third party vendor. "CST" represents accounts held by an outside custodian and not held or verified by LPL nor covered by LPL's SIPC Insurance. LPL is not an investment advisor or broker dealer to CST accounts and is not responsible for the holdings or management of the CST account. The source of all price information is the custodian or a third party vendor. In addition, data from "Outside", "sponsor's name", "CST" and "TMP" accounts may also display historical data. Please be aware that you have the obligation to verify the accuracy of third party advisory programs (TMP), outside custodians (CST) through reliable written documents from the custodian holding the assets. "U" represents "Unofficial Accounts" which may contain both "tracked" and "non-tracked" positions. Tracked positions are assets not held or verified by LPL nor covered by LPL's SIPC Insurance, for which you have supplied the quantity information to your Financial Advisor, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your Financial Advisor. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices as noted above. Non-tracked positions are assets not held or verified by LPL, for which you have supplied the price and quantity information to your Financial Advisor, through the delivery of a

statement or other record prepared by the investment sponsor or other source other than your Financial Advisor. LPL makes no representation or warranty as to the accuracy of the information concerning these Unofficial Accounts and non-tracked and tracked positions. Performance is not calculated in Performance Reports for Unofficial Accounts (either tracked or non-tracked assets).

Pre-June 2000 Data Not Available for Performance: Performance for LPL accounts is not available at the account, position, asset class, or security level prior to June 2000. Generally, performance for assets held directly with the sponsor is not available prior to May of 2010.

Net Change	-\$600.00	\$600.00
	Investor 1 Returns	Investor 2 Returns
Time Weighted (TWR)	10.00%	10.00%
Money Weighted (IRR)	-24.81%	35.04%
Return on Investment (ROI)	-15.38%	22.22%

If performance cannot be calculated for a period within the report timeframe, graphs will display a flat line and returns will display "N/A" or "-". For third party advisory programs (TMP), and outside custodians (CST), the above-noted performance calculations may differ from the methodologies used at the current or prior firm or custodian.

Fee-based Accounts: The figures for these accounts reflect the deduction of investment advisory fees. If the investment is being managed through a fee-based account or agreement, the returns are reduced by those applicable advisory fees. Refer to your Advisor’s Form ADV, Part II for more information.

Outside Positions: Outside positions are securities held directly by an outside sponsor rather than in an LPL account. They include positions held in accounts identified in the "Location" column with a term other than "LPL." There may be differences in the way each outside position is reflected based on these various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside positions. Information regarding outside positions may be limited because it is provided by a third party source.

Standard Benchmarks: Indices and benchmarks are unmanaged and cannot be invested into directly. For additional information regarding the indices that may be displayed, please contact your Financial Advisor. Benchmark returns may not correspond exactly to the benchmark returns displayed on LPL advisory performance reports or statements.

If returns shown in a report are calculated according to the time-weighted method, returns for the benchmark will be shown based on the simple method. The simple method tracks the return of the benchmark during the reporting period without regard to the timing and value of any additions or withdrawals from your account.

If returns shown in a report are calculated according to the money-weighted method, returns for the benchmark may be shown either based on the simple method or the money-weighted method. A money-weighted benchmark return generally seeks to represent how a hypothetical investment in the benchmark would have performed based on the cash flows in your account. Because money-weighted benchmarks are based on the cash flows in your account, the benchmark returns shown in the report are not likely to be comparable to the published returns for the same benchmark.

Income: Projected income totals shown are estimated and are rounded to the nearest dollar. Total values may reflect rounding discrepancies. If information is not available to calculate income on certain securities, those income generating securities will not be displayed on the report.

Money Market Funds: Money market fund investments are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the funds seek to preserve a value of \$1.00 per share, it is possible to lose money in money market funds.

Est. Income -Estimated Annual Income (EAI): For positions with annual dividends, the Estimated Annual Income is calculated by taking the annual dividend and multiplying by the number of shares owned. If dividends are more or less frequent, the dividend rate is multiplied by the frequency of the dividend and the number of shares owned. If no rate is available, no EAI numbers will be generated. EAI for certain types of securities could include a return of principal or capital gains in which case the EAI would be overstated. EAI is an estimate and the actual income and yield might be lower or higher than the estimated amounts. Additionally the actual dividend or yield may vary depending on the security issuers’ approval of paying the dividends. **Yield On Cost:** is your annual estimated income expressed a percentage of the cost of your investment. This metric can show you how efficiently your investments are earning income based on your purchase price and when compared to current-yield can often showcase the growth in income payments over time. Yield on cost cannot be used to compare with the yield of an investment alternative's stated yield. For such a comparison, refer to your investment’s current yield.

Holdings Sources: Positions held in your LPL account(s) are indicated with "LPL". The terms "Outside", "CST", "TMP" or a "sponsor's name" refer to securities held or by an investment sponsor or custodian that has agreed to electronically provide information to LPL about your holdings. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices for prices that are not readily available. For certain securities such as illiquid securities, pink sheet stocks, bulletin board stocks, and fixed income positions, substitute prices used in calculating performance and displayed on the report maybe prices based on trades occurring prior to the date of the missing prices. The source of all quantity information for these holdings is LPL, the prior custodian or the investment sponsor carrying your account. "TMP" represents accounts managed by an investment firm other than LPL as part of a third party advisory program. TMP accounts are held away from LPL and are not covered by LPL's SIPC Insurance. For TMP accounts, LPL's role is limited to a referral to the third party investment firm and LPL do not serve as broker-dealer. TMP accounts have not been verified by LPL. The source of all price information is the third party investment firm, a custodian or a third party vendor. "CST" represents accounts held by an outside custodian and not held or a third party vendor. "CST" represents accounts held by an outside custodian and not held or verified by LPL nor covered by LPL's SIPC Insurance. LPL is not an investment advisor or broker dealer to CST accounts and is not responsible for the holdings or management of the CST account. The source of all price information is the custodian or a third party vendor. In addition, data from "Outside", "sponsor's name", "CST" and "TMP" accounts may also display historical data. Please be aware that you have the obligation to verify the accuracy of third party advisory programs (TMP), outside custodians (CST) through reliable written documents from the custodian holding the assets. "U" represents "Unofficial Accounts" which may contain both "tracked" and "non-tracked" positions. Tracked positions are assets not held or verified by LPL nor covered by LPL's SIPC Insurance, for which you have supplied the quantity information to your Financial Advisor, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your Financial Advisor. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices as noted above. Non-tracked positions are assets not held or verified by LPL, for which you have supplied the price and quantity information to your Financial Advisor, through the delivery of a

statement or other record prepared by the investment sponsor or other source other than your Financial Advisor. LPL makes no representation or warranty as to the accuracy of the information concerning these Unofficial Accounts and non-tracked and tracked positions. Performance is not calculated in Performance Reports for Unofficial Accounts (either tracked or non-tracked assets).

Pre-June 2000 Data Not Available for Performance: Performance for LPL accounts is not available at the account, position, asset class, or security level prior to June 2000. Generally, performance for assets held directly with the sponsor is not available prior to May of 2010.

Portfolio Manager Report Disclosures

This is not an official LPL Financial ("LPL") statement and does not replace the statements you should receive directly from LPL or an investment sponsor. We urge you to compare the information (e.g., market values, transactions, inflows, outflows and fees) in this report with the information provided in the account statements you receive directly from LPL or the investment sponsor or custodian of the assets. This report has been prepared by your Financial Advisor for informational purposes only and is based on information provided by you, the investment sponsor, custodian of your assets, or what LPL has on its books and records. No representation is being made as to its accuracy or completeness. Position values shown may be actual values or estimates made by your Financial Advisor. Values shown should only be used as a general guide to position value and may vary from the actual liquidation value. Values shown may be as of a date prior to the date of the report. The information contained in this report should not be relied upon for tax reporting purposes. If a price is missing for a certain date, the report may use a substitute price from within the 30 days prior to the missing price date. Past performance is no guarantee of future results. Current performance may be lower or higher than the performance shown. Please contact your Financial Advisor to obtain performance current to the most recent month. If you have any questions, please contact your Financial Advisor at (800) 519-4015. (01/19)

Performance Calculations Performance return figures are expressed as a percentage and include the impact of the deduction of any advisory fees and transaction charges. Unless otherwise stated, performance returns are cumulative. Two different methods, time-weighted and money-weighted, are displayed on reports. The Advisory Performance Report uses a time-weighted return. The remaining reports use either a time-weighted or money-weighted return. The return method used on these reports is clearly labeled and can be configured by your Financial Advisor. The time-weighted method is used to depict an account's relative rate of return, is not sensitive to contributions and withdrawals into and out of the account, and, as compared to the money-weighted method, allows clients to better compare performance against other money managers. The money-weighted return method is used to depict an account's personal rate of return, accounts for all contributions and withdrawals into and out of the account, and, as compared to the time-weighted method, better represents the client's actual investment experience during the evaluation period. On your performance reports, money-weighted returns are denoted with IRR while time-weighted returns are denoted with TWR. Below is an example to clarify the difference of these two methods:

Example: Two investors begin by buying 100 shares at the end of the years' price (\$10), starting off with \$1,000. The first investor makes two subsequent purchases of 100 shares each, one at the end of May (\$14) and the other at the end of August (\$15). The second investor also makes two additional purchases of 100 shares each, but hers are at the end of April (\$8) and September (\$9). The price of the security at the end of the year is \$11, meaning the security is up 10%. The first investor shows a loss of \$600, while the second shows a gain of \$600. The time-weighted return for each investor is 10%. The money-weighted return for the first investor is -24.86% and the second investor is +35.16%.

	Investor 1	Investor 2
	Dec: 100 Shares @ \$10/s	Dec: 100 Shares @ \$10/s
	May: 100 Shares @ \$14/s	Apr: 100 Shares @ \$8/s
	Aug: 100 Shares @15/s	Sept: 100 Shares @9/s
Net Invested	\$3,900.00	\$2,700.00
Ending Value	\$3,300.00	\$3,300.00
Net Change	-\$600.00	\$600.00
Time Weighted (TWR)	10.00%	10.00%
Money Weighted (IRR)	-24.86%	35.16%

If performance cannot be calculated for a period within the report timeframe, graphs will display a flat line and returns will display "N/A" or "---". For third party advisory programs (TMP), and outside custodians (CST), the above-noted performance calculations may differ from the methodologies used at the current or prior firm or custodian.

Purchase Date Purchase date reflects the earliest purchase date for any portion of the position. Additional purchases may have been made after the initial purchase.

Special Note about Certain Performance Reports For the Comparative Analysis Report, only positions that were held at the Start Date and/or at the End Date will be shown; however, positions held in the account after the Start Date and sold prior to the End Date will be reflected in the performance figures shown on the report. For the Portfolio Appraisal Reports, only securities held at the End Date will be shown; however, positions held in the account on or after the Start Date and sold prior to the End Date will be reflected in the performance figures shown on the report.

Location Columns The terms used under the column with the heading "Loc," which include "LPL", "CST", "TMP," and "U" refer to securities held in your LPL account(s) or by an investment sponsor that has agreed to electronically provide information to LPL about your holdings.

"LPL" represents accounts with assets maintained at LPL.

"CST" represents accounts held by an outside custodian that are not held or verified by LPL nor covered by LPL's SIPC Insurance. LPL is not an investment advisor or broker-dealer to CST accounts and is not responsible for the holdings or management of the CST account. The source of all price information is the custodian or a third party vendor.

"TMP" represents accounts managed by an investment firm other than LPL as part of a third party advisory program. TMP accounts are held away from LPL and are not covered by LPL's SIPC

Insurance. For TMP accounts, LPL's role is limited to a referral to the third party investment firm and LPL does not serve as broker-dealer. TMP accounts have not been verified by LPL. The source of all price information is the third party investment firm, a custodian or a third party vendor.

Please be aware that you have the obligation to verify the accuracy of data for outside accounts, including CST, and TMP accounts, through confirmations, statements and other correspondence and documents you receive from the custodian holding the assets.

"U" represents "Unofficial Accounts" which may contain both "tracked" and "non-tracked" positions. Tracked positions are assets not held or verified by LPL nor covered by LPL's SIPC Insurance, for which you have supplied the quantity information to your Financial Advisor, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your Financial Advisor. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices as noted above. Non-tracked positions are assets not held or verified by LPL, for which you have supplied the price and quantity information to your Financial Advisor, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your Financial Advisor. LPL makes no representation or warranty as to the accuracy of the information concerning these Unofficial Accounts and non-tracked and tracked positions. Performance is not calculated in Portfolio Manager reports for Unofficial Accounts (either tracked or non-tracked assets).

Personal Assets This report may include personal assets that the firm does not hold on your behalf, and that are not included on the firm's books and records. Personal assets include the following:

- Collectibles (e.g., art, antiques, coins, stamps)
- Real estate (e.g., personal residence, vacation homes, investment property)
- Intangible Assets (e.g., patents, trademarks, copyrights, goodwill)
- Checking and savings accounts
- Business ownership/interests (e.g., equipment, inventory, property, accounts receivables)
- Insurance
- Personal Property (e.g., cars, snowmobiles, etc.)

Information about personal assets is shown as an accommodation to you. The value of personal assets has not been verified by the firm and is included for informational purposes only. You should not use information about personal assets on this report for lending, legal, or tax purposes. You are encouraged to review and maintain any applicable source documents related to personal assets as they may contain notices, disclosures and other important information.

Outside Positions Outside positions are securities held directly by an outside sponsor rather than in an LPL account. They include positions held in accounts identified in the "Loc" column with a term other than "LPL." There may be differences in the way each outside position is reflected based on these various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside positions. Information regarding outside positions may be limited because it is provided by a third party source.

Pre-June 2000 Data Not Available for Performance Performance for LPL accounts is not available at the account, position, asset class, or security level prior to June 2000. Generally, performance for assets held directly with the sponsor is not available prior to May of 2010.

Direct Participation Programs and Alternative Investments Direct participation program securities (e.g. partnerships, limited liability companies, fund of hedge funds, managed futures, and real estate investment trusts that are not listed on a national exchange or NASDAQ) are generally illiquid and you may not be able to liquidate. Securities prices may vary from actual liquidation value and should not be relied upon. The values for these securities generally are provided by the management of the program and represent the management's estimate of the investor's interest in the net assets of the program.

Cost Basis Transactions shown in the reports are automatically paired against holdings on a "First-In/First Out" basis (unless manually adjusted), and for this reason, may not match the cost basis provided in a trade confirmation or statement. In addition, because the cost basis on certain securities may have been provided by a source other than LPL, the cost basis on this report may not reflect accurate data or correspond to data on your trade confirmations. If cost basis is not available, N/A or "----" is used as the cost basis. For any assets purchased in the account, the cost basis is the actual purchase price including transaction charges.

Index and Benchmarks Indices and benchmarks are unmanaged and cannot be invested into directly. For additional information regarding the indices that may be displayed, please contact your Financial Advisor. Benchmark returns may not correspond exactly to the benchmark returns displayed on LPL advisory performance reports or statements.

If returns shown in a report are calculated according to the time-weighted method, returns for the benchmark will be shown based on the simple method. The simple method tracks the return of the benchmark during the reporting period without regard to the timing and value of any additions or withdrawals from your account.

If returns shown in a report are calculated according to the money-weighted method, returns for the benchmark may be shown either based on the simple method or the money-weighted method. A money-weighted benchmark return generally seeks to represent how a hypothetical investment in the benchmark would have performed based on the cash flows in your account. Because money-weighted benchmarks are based on the cash flows in your account, the benchmark returns shown in the report are not likely to be comparable to the published returns for the same benchmark.

LPL Benchmarks The LPL benchmark is calculated using a weighted average of the indices, in the percentages specified as noted above. The LPL benchmark may represent the benchmark for the current investment objective for the account or a benchmark assigned to your account or group of accounts by your Financial Advisor. Please keep in mind that the investment objective for the account may have changed over time.

Income Projected income totals shown are estimated and are rounded to the nearest dollar. Total values may reflect rounding discrepancies. If information is not available to calculate income on certain securities, those income generating securities will not be displayed on the report.

Money Market Funds Money market fund investments are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the funds seek to preserve a value of \$1.00 per share, it is possible to lose money in money market funds.

Securities offered through LPL Financial, Member FINRA/SIPC. Advisory Services offered through LWM Advisory Services, LLC, a Registered Investment Advisor. Legacy Wealth Management and LWM Advisory Services, LLC are separate entities from LPL Financial.

To the extent you are receiving investment advice from a separately registered independent investment advisor, please note that LPL Financial is not an affiliate of and makes no representation with respect to such entity.

Performance results prior to June 2014 reflect the performance of investments held in your account prior to LWM Advisory Services, LLC's management of the account's investments.

Advisory services offered through LWM Advisory Services, LLC. Securities offered through LPL Financial, member FINRA/SIPC. LPL Financial, LWM Advisory Services, LLC and Legacy Wealth Management are affiliated companies. Values are as of 02/04/2020 unless otherwise noted. **This is not an official LPL Financial ("LPL") statement; it has been prepared by your Advisor for informational purposes only, and does not replace the statements you should receive directly either from LPL or from the investment sponsors for which LPL is the broker-dealer of record or any other outside custodian.** It is intended to estimate the total value of your investments for which you receive such statements, as well as any investments held away from LPL about which you have provided to your Advisor information from which values can be estimated. This report has been prepared from data believed to be reliable but no representation is being made as to its accuracy or completeness.

The report includes securities held in your LPL account(s) or that LPL does not hold on your behalf and which are not included on LPL's books and records. These outside positions are securities held directly by an outside sponsor rather than in an LPL account. There may be differences in the way each outside securities position is reflected based on the various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside securities positions. Information regarding outside securities positions may be limited because it is provided by a third party source.

Values shown should only be used as a general guide to portfolio value, and may vary from the actual liquidation values. Accounts held away from LPL are not covered by LPL's SIPC Insurance. The LPL Financial SIPC Membership provides account protection only to those assets held at LPL. To the extent some of the other entities may be SIPC members, please contact your financial advisor or the other entity or refer to the other entity's statement regarding SIPC membership. Position values, size of positions, and dates, may be estimates made by your Advisor based on information you have provided. The information contained in this report should not be relied upon for tax reporting purposes, accounting, or valuation purposes. The source of all price information for tracked positions is one or more third party vendors and may include the use of substitute prices where prices are not readily available.

Past performance is no guarantee of future results. Current values may be lower or higher than the values shown. We urge you to compare the information (e.g. market values, transactions, inflows, out flows, and fees) in this report with the information provided in the account statements you receive directly from LPL Financial, the investment sponsor, or custodian of the assets. If you are not receiving statements from your custodian, please contact your custodian directly or call LPL Financial at 800-558-7567.

For fee-based accounts only: The figures may or may not reflect the deduction of investment advisory fees. If the investment is being managed through a fee-based account or agreement, the returns may be reduced by those applicable advisory fees. Refer to your Advisor's Form ADV, Part II.

The Cost Basis information is subject to the validity of the supplier of cost basis information and should not be used for tax purposes. Please refer to your original statements and/or confirms.

For assets not purchased in the LPL account, you or the previous broker/dealer upon transfer may have provided the date acquired and purchase cost of the position. If no such data was submitted, N/A may be listed as the purchase Cost. N/A displays when investment information is incomplete and may be treated as zero when calculating Gain or Loss totals. Since the date acquired and the purchase cost on certain securities may have been provided by another source, this information may not reflect accurate data or correspond to data on your trade confirmations. This report may use one of the following accounting methods: First In, First Out (FIFO); Last In, First Out (LIFO); Average Cost, or Average Cost Long Term. For information on the method used, please contact your advisor.

Designating liquidations as "versus payment" date on a trade confirmation will not adjust the cost basis information on your statement or in this report. If this report includes outside accounts, manual accounts, or groups of accounts, detailed descriptions of terminology and calculations used in this report can be obtained by requesting information from your advisor.

The Modified Dietz formula is used as an approximation to the true, money-weighted rate-of-return (MWRR) or internal rate of return (IRR). The portfolio or asset is valued at the starting and ending points of the period. Cash flows are included in the calculation based on their timing (i.e., when they occurred during the period). The Modified Dietz will yield a result which approximates the IRR, which is the true, money-weighted rate-of-return. If the cash flows and returns are large, then the ability for the Modified Dietz to approximate the IRR is diminished. Otherwise, the Modified Dietz serves as an acceptable approximation to the IRR.

Positions on this statement may include assets that are not held or verified by LPL, for which you have supplied the price and quantity information to your LPL representative, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your LPL representative.

This report may include personal assets that the firm does not hold on your behalf, and that are not included on the firm's books and records. Personal assets include the following:

Collectibles (e.g., art, antiques, coins, stamps)

^A This report may include assets that the firm does not hold and which are not included on the firm's books and records.

Introduction - Statement of Purpose

This Investment Policy Statement (IPS) is intended to provide a clear understanding between the Florida West Coast Operating Engineers Apprenticeship Trust Fund, LWM Advisory Services, LLC., Advisor and Tony DuBose, Investment Advisor Representative regarding the objectives, goals, and guidelines established by the trustees for the investment of assets.

This IPS is not a contract. It is intended to assist the trustees and Advisor in effectively supervising, monitoring and evaluating the management of the trust assets. These policies will be reviewed and/or revised as necessary to reflect any changes related to the portfolio, the trustees, or the markets. There is no assurance that the goals and objectives outlined herein will be achieved.

The trustees shall promptly notify the Advisor of any changes in the investment situation.

The trustees recognize and acknowledge that risk must be assumed in order to achieve the long-term investment objectives and that there are uncertainties and complexities associated with investment markets.

The trustees understand that achievement of the trust goals and objectives are measured against long-term objectives and not against short-term market fluctuations.

1. Investment Goals

a. Risk and Time Horizon

*Investments to be focused on income, low risk Capital Preservation-oriented investments.
Time horizon (5-10 Years)*

b. Liquidity Constraints

Immediate or near-term cash requirements may create the need for more liquid assets despite the overall long-term objectives. Trustees have the following liquidity constraint(s):

Spending Policy

The forward annual projected distribution need = _____. This amount is based upon discussions with the trustees of the portfolio.

c. Tax Consequences/ Non-Qualified Accounts

Legacy Wealth Management and Tony DuBose do not provide tax advice. However, during the asset management process, as information is available to the Adviser, the following tax considerations communicated by Client will be observed:

Non-Profit, Not Applicable

2. Investment Objectives

The primary investment objective of the assets placed under management is *Income with Capital Preservation*, (Conservative), although the trustees acknowledge that past performance does not guarantee future results, this portfolio should be constructed to satisfy diversification and asset allocation strategies and designed to meet the goals and objectives over time.

The nature of the investment objective reflects the trust risk tolerance, time horizon and goals, and can be described as follows:

Income with Capital Preservation (Fixed Income)

- *Investors in this portfolio should have a time horizon of more than five years and be comfortable with the volatility that will occur with changing interest rates and credit risk.*
- *Emphasis is placed on generation of current income and prevention of capital loss.*
- *The primary investment objective of this portfolio is to generate income and preserve capital.*
- *A minimum of 30 % of fixed income investments are allocated to high quality U.S. Non-Corporate Bonds credit quality as rated by S&P of AA+. A maximum of 50 % of the portfolio assets may be invested in Investment Grade Corporate Bonds as rated by S&P with a credit quality of BBB or better. A maximum of 5 % of the portfolio may be invested in fixed income securities with credit quality of below investment grade as rated by S&P.*

3. Investment Guidelines

a. Asset Mix

Although there is no guarantee of success, investments in the portfolio will be prudently diversified using asset allocation methodology.

100 % US Fixed Income and cash

b. Permissible Investments

The assets under management shall be invested in a manner that is consistent with the client's goals and objectives.

Client agrees to use the following security classifications:

- **FDIC Insured Bank Certificate of Deposits**
- **Individual Debt Instruments: United States Government Obligations, agencies of the United States Government (i.e., US Treasuries, Treasury Inflation Bonds (TIPS),**

debt instrument issued by Ginnie Mae, Fannie Mae, Freddie Mac, Federal Home Loan Bank, Federal Farm Credit Bank and Federal Home Loan Mortgage Corp).

- ***Investment Grade Corporate Bonds issued by US Corporations with credit quality of BBB- or better as rated by S&P. 50 % Maximum 5 % to any one issuer.***
- ***Cash Reserves: Interest bearing securities, free from risk of loss, price fluctuation and instantly saleable. Shall consist of individual fixed income securities such as Certificates of Deposit, U.S. Treasury Bills, and other similar instruments with less than one year to maturity and/or money market funds (Non-Corporate).***

c. Prohibited Investments and Transactions

Client designates the following as prohibited transactions in the account:

- ***The following investments shall not be included in the account:***

Foreign Bonds may not be utilized.

Equities may not be utilized

REITS, Managed Futures, and Hedge Funds are not be utilized.

4. Investment Review

a. Performance measurement

Client represents that the following benchmark reflects investment parameters against which portfolio performance shall be compared on a regular basis:

50-% Lehman Government Credit Index 1-3 Years

50-% S&P/Citigroup US Broad Investment Grade Index

Factors influencing performance deviations will be described by the Advisor in quarterly reports to the Client.

5. Modification of Investment Policy Statement

a. Advisor/Client Meetings

Advisor and Client will meet as required to review the portfolio and investment results in the context of this Investment Policy Statement.

Factors affecting the asset management process, including the economy and interest rates, will also be discussed.

b. Modifications

Any modifications to the Investment Policy Statement shall be promptly documented and disseminated to all affected parties.

Past Modification Dates:

C. Defining S & P Credit Ratings

'AAA'—Extremely strong capacity to meet financial commitments. Highest Rating.

'AA'—Very strong capacity to meet financial commitments.

'A'—Strong capacity to meet financial commitments, but somewhat susceptible to adverse economic conditions and changes in circumstances.

'BBB'—Adequate capacity to meet financial commitments, but more subject to adverse economic conditions.

'BBB-'—Considered lowest investment grade by market participants.

'BB+'—Considered highest speculative grade by market participants.

'BB'—Less vulnerable in the near-term but faces major ongoing uncertainties to adverse business, financial and economic conditions.

'B'—More vulnerable to adverse business, financial and economic conditions but currently has the capacity to meet financial commitments.

'CCC'—Currently vulnerable and dependent on favorable business, financial and economic conditions to meet financial commitments.

'CC'—Currently highly vulnerable.

'C'—Currently highly vulnerable obligations and other defined circumstances.

'D'—Payment default on financial commitments.

Note: Ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

This Investment Policy Statement has been reviewed and accepted by the trustees of the Trust and Adviser.
